

The Ultimate Value is Performance

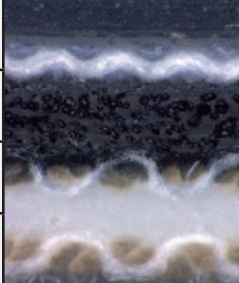

Supacup **FE-30 UV (Antistatic)**

High Performance UV Blanket for Improved Print Quality on Plastics

The "antistatic" surface compounds used in the FE-30 UV prevent the costly feeding & print quality problems caused by static build-up on plastics.

■ Applications

- High Speed UV sheetfed
- UV Rotary & Semi Rotary Label Presses
- Specialised UV presses for printing plastic cups & tubs (yoghurt, margarine etc)

Specifications		Cross Section
Type	Compressible	
Thickness	.067, .077	
Color	Black	
Hardness	77 (Shore A)	

■ Features

- Excellent dot reproduction and solid density
- High resistance to UV inks and washes
- Outstanding durability against swelling, embossing and edge cutting
- Impact-resistant compressible layer gives fast recovery from smashes
- Long life from abrasion resistant surface compound
