

The Ultimate Value is Performance

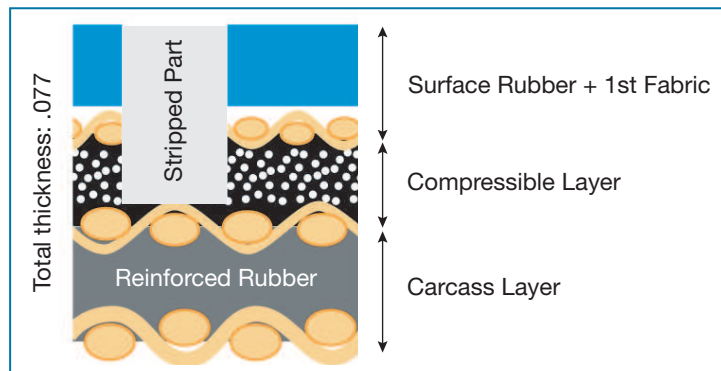

Supapcoat FP-75

Dual purpose coating blanket for the application of UV and Aqueous Coatings

■ Superior Coating Performance

Designed to give superior in-line coating performance with UV and Aqueous Coatings. Consists of a special new surface rubber formulation to guarantee a smooth and even transfer of coating onto all substrates at high press speeds.

■ Cross-Sectional Structure

■ Simple to cut and peel with good relief depth

After cutting, the surface rubber and first fabric layer can then be peeled away easily and quickly from the compressible layer leaving a relief depth of .038

■ Features

- Smooth and even transfer of coating onto all substrates
- High Resistance to swelling caused by coatings and washes
- Quick and trouble free stripping from a unique compressible layer
- Outstanding flexibility for fast and simple mounting on the cylinder
- High endurance and dimensional stability
- Available in .067 & .077 thickness
