

XTUV

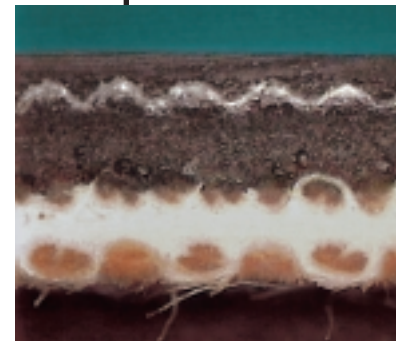

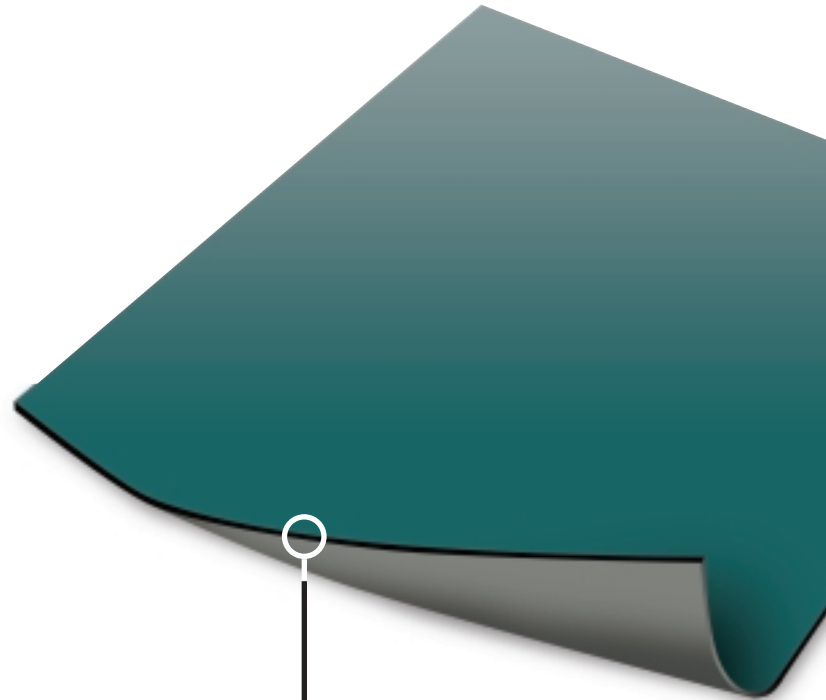

Offset Blankets

Performance Surface Substantially Reduces Degradation And Swelling

MacDermid XTUV is a 78 Shore A blanket whose buffed rubber surface is resistant to UV and conventional inks and washes, providing printers with an exceptionally durable and more efficient blanket.

Our **XTUV** blankets are built on a compressible, pre-stretched fabric over foam carcass that also eliminates gauge loss and provides a wider packing latitude and operating window. With MacDermid XTUV, you can use a wide variety of paper stock in your sheetfed, small web and form presses, proving it is one of the most versatile choices available to you today.

For printing blankets that offer minimal degradation and swelling, count on the company that says "Yes We Can." MacDermid.

Key Features

- Accepts both UV and conventional inks and washes
- Fast release and uniform gauge
- Wider packing latitude
