

Vulcan[®] Com No Pak[™]

A New Concept
For Commercial
Web Printers.

VULCAN[®] COM NO PAK[™]

Engineered. Not Just Manufactured.

Construction Features

Specially Engineered Carcass Technology with Unique Closed-Cell Compressible Layer

Specially Engineered Fabrics

Low-Compression-Set Rubber Compounds

High-Density Fabrics

Super-Fine Buffed Face

Performance Features

No Packing Necessary

Impression-Tested in the Lab and in the Field

Improved Reboundability During Compression

Benefits

Fights smashes, resists gauge loss, and limits edge cutting when changing widths.

Reduce on-press gauge loss to .001".

Allow extra fast rebound at high speeds. Minimize blanket "sinking."

Assure you greater on-press stability. Improve resistance to smashes.

Results in excellent printability.

Benefits

Eliminates packing sheets. Reduces blanket mounting time.

Improves blanket performance. Even after run-in and during repeated impressions, blanket settles in quickly and retains pressure at its nip.

Improves smash resistance, service life.

Technical Specifications

Description: Compressible blanket designed specifically for use without packing sheets on presses that have a .071" blanket undercut

Face: Slate gray

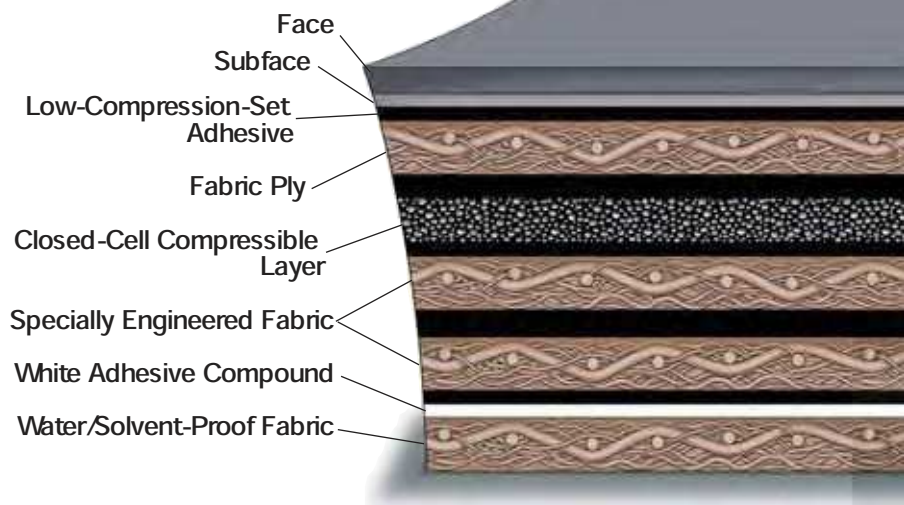

Surface: Fine buffed

Available Thicknesses:
4 Ply — .077" ± .0005"

Face Compound: Specially blended rubber compound

Fabric Backing: Water and solvent proof

Micro Hardness: 70° (typical)
