

Born to be the leading actor.

Vulcan Folio, the 5 stars printing blanket for sheet-fed, is the fruit of the most modern technology. Vulcan Folio has a special compressible layer (Vulcan DynaTech System is applied) to avoid shock marks and it is suitable for all kind of modern high speed sheet-fed presses. The reduced gauge loss gives a real advantage to those printers demanding high quality and consistency. The sharp dot reproduction is the best that can be achieved thanks to its micro-buffed printing face.

Main Application:

Quality sheet-fed printers choose Vulcan Folio to differentiate their print jobs with added value.

The Product at a glance:

Thickness & number of ply:

1.96 ± 0.02 mm 3 ply

Printing surface colour and finish:

dark green - micro-buffed 0.5 – 0.8 u

Type of compressible layer:

closed cells

Microhardness (IRHD):

66 ± 3

Maximum linear expansion:

1 %

Tensile force (DIN 16621)

> 4500 N

Average load development at 0.23 mm indentation:

approx. 250 N/cm²

Gauge loss:

0.01 – 0.03 mm

WSP treatment of fabric ply:

full

Oems approvals

Vulcan Folio performance is so superior that most of Oems have approved this blanket as 1st dress on their new sheet-fed presses.

For this reason, Vulcan Folio has become the most popular blanket dressed on sheet-fed presses during the most important trade shows around the world.

Vulcan Folio, taking Print Quality around the world.
