A Revolutionary
Non-Directional
Compressible Blanket That's
Not A Compromise!

REEVES.
BROTHERS, INC.

VULCAN[®] ND 999 STICKY BACK

Engineered. Not Just Manufactured.

Construction Features

New Biaxial Layer
Closed-Cell Compressible Layer
Precision-Ground, Controlled Surface Profile
High-Strength, Woven Fabric Layer
Pressure-Sensitive Adhesive Backing

Performance Features

Non-Directional Properties
True Compressibility
High Tear Strength
Exceptional Print Fidelity
Easy Mounting/Easy Cleaning

Benefits

Mounts in any orientation.
Eliminates bulge or blanket displacement near the nip.
Assures excellent release and sharp printing.
Remains stable on the cylinder and is easier to mount and remove.
Adheres to metal cylinder with the right amount of grip.

Benefits

Allow press operators to cut the blanket in any direction to maximize yield.
Produces sharp, true print *without* damaging carbonless forms.
Prevents blanket from tearing when it's removed from cylinder.
Results in quality printing that's comparable to the best sheetfed blankets.
Shortens make-ready times and reduces downtime.
