

MAJESTIC SRF

Excellence in Every Revolution

MAJESTIC SRF

Specifications:

Construction Features:

Majestic offers a unique closed cell compressible layer. This feature coupled with a low-compression-set surface allows the Majestic blanket to last longer, fight smashes, and limit edge cutting when changing widths. In addition, this carefully constructed design minimizes blanket sinking. With regard to the canvas back-side of the blanket, Majestic SRF is designed using a water/solvent-proof fabric. Solvents do not penetrate through, sustaining the integrity of the blanket.

The Rubber Face:

The SRF (Super Release Fine) feature offers better consistency and superior print quality, impression after impression. The SRF feature is the ultimate answer in improving sheet release and transferring ink evenly. You can expect sharper dot reproduction from the Majestic SRF.

Face Color:	Dark blue
Ply:	3 ply (.067 +, - .001) 4 ply (.077 +, - .001)
Surface:	Ground & Highly Polished
Hardness:	82 Shore A (typical)
