

WebKing

MacDermid Printing Blanket

Designed To Reduce Piling in the Modern Pressroom

The WebKing features a unique buffed rubber surface that has an exceptional affinity for water – reducing piling and makes cleanup easier. Built on a resilient, compressible, fabric over foam carcass, the WebKing provides consistent high print quality over a long stable life on any type of web press, whether its high-speed, narrow gap, double wide, one around or two around. WebKing, an excellent choice for the discriminating sheetfed printer.

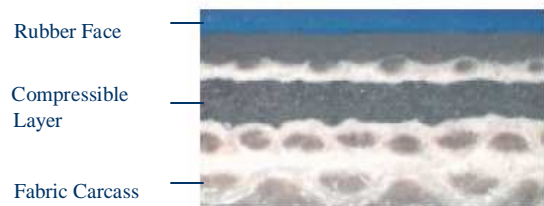

Key Features

- Allows one blanket to be changed without affecting registration
- Consistent print quality in high-speed web applications
- Optimized Ink Transfer
- Sink and Stretch resistance
- Significantly reduced piling
- Faster cleanup
